11- You have the right to have your content protected against hackers. ( )

12- You should always show a positive behavior in your interactions with others via the Internet. ( )

13- You can share information or programs with your friends knowing that it is the result of piracy.))

14- To be a successful digital citizen, you must evaluate how you use the Internet. ( )

15- The digital citizen can use ICT tools to learn, share and communicate. ( )

16- Electronic devices help people with determination to learn( )

17- You can learn languages using images available on digital devices. ( )

18- We did not benefit from digital devices in learning during the Corona crisis. ( )

19- You can learn a lot of skills through video sharing platforms. ( )

20- You can share a video clip of your preparation without consulting a member of your family ( )

21- Social media enables you to communicate with your classmates and virtually work outside of school. ( )

22- We use Skype for virtual meetings. ( )

23- Synchronous communication is communication that occurs in real time via instant responses ( )

24- Asynchronous communication requires immediate response ()

25- One of the tools needed to enter chat rooms is Internet browsers ( ).

26- To be able to conduct instant messaging, you must have an instant messaging program on your computer ( )

27- E-mail is considered one of the official means of communication ( )

28- To start a video chat, you need to create a link and send it to the participants ( )

29- To join a video chat, you need to create a link and send it to the participants ( )

30- You cannot turn off the microphone while you are participating in a video chat ( )

31- In chat rooms you should be polite and positive ( )

32- In e-mail you can use short phrases and symbols ( )

33- In instant messaging, salutations and closing phrases should be used ( )

34- Edmodo is considered one of the online learning resources ( )

35- EKB is one of the online learning environments ( )

36- Vlaby is a virtual laboratory platform through which you can conduct experiments ( )

37- National Geographic Kids is one of the online learning environments ( )

38- Planning a digital research helps you focus your search on the information you are trying to collect ( )

39- It is important to evaluate your digital research sources, whether they are reliable or unreliable ()

40- You can use social networking sites as a reliable source of information ( )

41- In your digital research, you can use only text sources ( )

42- It is good to diversify the sources of information in your digital research ( )

43- Gautam Shah is the founder of the Internet of elephant organization

44- Gautam Shah worked as an expert in the field of information technology ( )

45- Gautam Shah decided to use his expertise in technology to eradicate wildlife ( )

46- Gautam Shah used online games to bring wildlife into people's daily interests ( )

47- You can use augmented reality technology to learn the solar system in a more fun and field way

48- In the case of explaining complex statistics, it is preferable to put them in a chart for ease of understanding ( )

49- A hypothesis is a scientific guess about how things will happen

50- In the event that the technological problem you are facing is more complex, you must divide the problem into small parts ( )

51- When solving problems, you cannot use people to help you ( )

Write in front of each situation, which comes as the appropriate means of communication

(synchronous connection - asynchronous connection)

1- Communication between friends and relatives

2- When the response to your request requires thought and preparation (   )

3- Want to talk about everyday life issues(   )

4- If you have important but not urgent information that you want to pass on to someone (   )

5- Communicating with someone you don't know well (   )Arrange the steps for solving the following problem

When I started typing on the Word program, I discovered that the keyboard does not write on the program(This question does not have a typical answer. The child can arrange the steps according to his point of view)

( ) Seek help from your teacher

( ) Make sure that the keyboard cable is connected

( ) Reboot the device

( ) Write some letters for the experiment

( ) Close and start the Word program

( ) Try another keyboard
